Native

WORK EXPERIENCE

Application Programmer

Arabian Drilling Company (ADC)

29/10/2019 – 29/4/2020 (6 months)

Developing Programs for the company's reports. The focus was on using my computer skills to automate work that was manually done in order to save time and effort in addition to reducing potential errors resulted from manual work. I've used Excel formulas as well as Visual Basic for Applications (VBA) codes to generate dynamic reports. Also, I learned about Microsoft Power BI basic functionalities.

PERSONAL PROJECT

Time and Location Based Reminder

01/2019 – Present

A mobile application for Android that allows users to set a reminder based on either time, location or both in an easy way with the ability to talk to the app's agent to set the reminder automatically. It aims to help people remembering their tasks once they enter the associated area in order to solve the problem of forgetfulness that many people suffer from.
