

BATOL ALI ALHAJJI

OBJECTIVE

Skilled computer science graduate with experience in software design and development.

Advanced knowledge in various programming languages. Exceptional collaborative and interpersonal skills; dynamic team player with well-developed written and verbal communication abilities, eager to learn and grow professionally with a goal to become a valuable asset for a company. My goal is to use my experience of web development, machine learning, security and networking in a company that will encourage me to improve my technical and programming skills.
