## OBJECTIVE

---

### Dear Sirs:

I am a PMP certified Electrical engineer professional with 19+ years of diversified experience in delivering engineering & design solutions and core competencies in project /constructions management, design, management and execution with competencies in overall administration, leadership and technical direction for projects and to insure they are constructed safely in accordance with contract documents, design, budget, schedule and in compliance with all federal, state and local laws. I am seeking a managerial position to utilize construction experience, management skills and design savvy to deliver exceptional design solutions with right aesthetic and commercial values.

As my CV demonstrates, I am proficient in directing construction phase activities including project definition, budgeting, scheduling, value engineering and contract negotiation, modification and close out. I have been responsible for planning, executing, and finalizing Electrical works according to strict deadlines and within budget as well as overseeing project controls and design implementation, ensuring project goals and objectives are accomplished within prescribed time frames, scopes, and funding parameters. I am proficient in identifying cost related problems which arise during project executions and recommends corrective actions and solutions.

What I bring to the position is energy and business rigor with expert administrative and technical knowledge of construction process with a high degree of maturity and sound judgment in improving efficiency in control of cost in all phases without compromising quality. My adeptness in project risk, quality management, negotiation, and supervision renders me capable of utilizing these skills successfully for any project assigned to me. I have built effective working relationships with clients and the project team members to minimize project risk and ensure high quality service to assigned clients.
