PERSONAL STATEMENT

I'm a qualified to design and analyze civilian projects with over 9 years of experiences, as a supervisor projects engineer in project field, desiring to learn and develop my expertise to be a part of a highly professional team and seek greater challenges and more responsibilities in order to apply the knowledge attained from my education, previous works and experience and widen it.

Area of Experience

- **Project Management:** Proven progression of project management promotions and responsibilities as a result of an excellent performance track record in planning, scheduling, coordination and managing activities for various construction projects in KSA.
- **Site construction engineer:** Provide project estimates and surveys, and solicit specialty contractor bids to ensure project compliance and completion, conduct quality control inspections intermediately and in the punch list phase of projects; review workloads and set priorities to meet required project schedule and objectives.
- **Project Analysis:** Perform cost comparison analysis of sub-contractors vs. self-performance to maintain cost controls; review material/subcontractor invoices for approval, recognize work schedule and flow to reduce costs and improve efficiency, analyze and ensure construction ability and methodology throughout all phases of the project.
- **Structural design:** using Etabs , Revit robot structural analysis , SAFE , concrete steel designs , according to international & local standard & codes.
- **Architectural design:** using 3ds max for 3d models, Revit, AutoCAD . for residential projects, interior & exterior design.
