2018

Research Assistant  
Basic Applied Scientific Research Center IAU.

June-July  
2018

Accountant  
Nouryat center, Dammam

## Research

2020

Computational modelling and optimization of transmission coefficient in GaN and GaAs based resonant tunneling diodes using the transfer matrix method.

2019

Effect of yttrium substitution on microstructural, optical, and photocatalytic properties of ZnO nanopowder.

## Activities

2018

Field services ,IAU

2016

Content Management ,Upscale company

2016

Field services ,Arfams association

2016

Field services , general sports authority
