English

Summary

Junior Web Developer specializing in Networking and Information Technology. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, CSS, Java OOP, JavaScript, C++, MySQL. Strong background in communication and computer skills.

Experience

Academic Project - 09/2019 to 12/2019
Alnahdi Website Enhancement, Saudi Arabia
- Communicate and cooperate with group members to brainstorm features and ideas to add to the website.
- Develop project concepts and maintain optimal workflow.
- Designed BPMN, use case diagram, sequence diagrams and activity diagrams to show how the features contribute to the website.

Software Development Intern - 06/2020 to 08/2020
Developing automation system for reporting the investment of final exam results at IAU colleges, Quality of Assessment and Examinations Center at IAU, Saudi Arabia
- Volunteered as the leader of the project where I gained leadership knowledge throughout the training.
- Created a full Analysis for the assigned project including a BRD and a Gantt chart.
- Worked on the Website design using Html5 + CSS.
- Created the system using C# language and JavaScript.
- Created the database using MS SQL DB.

Academic Project - 09/2020 to 04/2021
Masar IoT based School Bus Tracking System, Saudi Arabia
- Volunteered as the leader of the project.
- Created the system using PHP and Android Studio.
- Published a research paper about the project.
- Gained community service hours by serving the project to our client Al-Tarbeia Al-Ahleya school.
