- IELTS 5.5 (2016)

SUMMARY

I am hard working and self-motivated during tasks. I believe my ability to communicate effectively and solve problems to drive for results was elevated during my education and short experience. My goal is to continue pursuing development as it's vital for my career and on a personal level. Having passion and commitment towards my Engineering Discipline was the main force behind my success and it will still encourage me to go beyond my comfort level and to stretch my capabilities and reach the apex of my learning curve. I believe my ability to adapt quickly and rapidly take action has developed my confidence in my competencies and I would like to demonstrate this during my experience in an organisation as its will ensure that I keep learning and working to achieve beyond my objectives
