PROFILE

A recent graduate with a Bachelor degree in Biomedical Engineering from the University of Lübeck in Germany. During my degree, I acquired several additional qualifications, such as specialist knowledge in accordance with the X-ray Ordinance and Radiation Protection Ordinance. I also had extensive experience working with medical equipment, due to the frequent laboratory assignments and projects. I am currently looking for an inspiring work environment that allows me to develop through good training opportunities

EDUCATION

Additional Qualification

Expertise in Radiation Protection
Expertise in X-Ray Protection

Bachelor in Biomedical Engineering

Technical University of Lübeck
2016-2021

Focus: Development of Medical
equipment

Studienkolleg Hamburg

Note: 2,8
2015-2016

SKILLS

LANGUAGES

Quick learner

SOFTWARE SKILLS

- Microsoft Office (Word, Excel, PowerPoint)
- Good in C++, Matlab, Simulink, Python, CAD
- Knowledge of creating electronic Circuits
- Knowledge in Microcontrollers and Microprocessors

EXPERIENCE

Competence and science center for intelligent energy use November 2020 - April 2021

- TH Lübeck, Germany
- Internship in intelligent energy use of energy storage systems for a commercial building

Laboratory for medical sensors and device technology April 2020 - July 2020

- TH Lübeck, Germany
- Internship in development & construction of precision mechanical bearing for a magnetic particle imaging scanner
