ABOUT ME

Curiosity always leads me to explore new things and get to know new horizons, whether in the field of interior architecture or other topics. I always find pleasure in learning a new skill, and I do not find that education is limited to age, time, or place, as there is always something new in the world, and this made interior architecture a field close to me as it is a renewable field

EDUCATION

2020: A graduate of Imam Abdulrahman bin Faisal University with a Bachelor's degree in Interior Architecture with GPA of 3.2 out of 5

EXPERIENCE

1 year of working as a product photographer in retail stores, in addition to working on several projects during the 4 years as a freelance photographer, from which I gained experience in dealing with clients and accurately understanding their desires

2 months of professional training in YIH architectural & consultants office where the beginning was to work on initial quotations for clients and the issuance of bills of quantities, then I gradually worked on some interior design projects. The experience enriched me by knowing how to work in the labor market professionally with clients.

3 months on the job in Noura Al-Saud Engineering Consulting Office in the Architectural Department, where the department is responsible for the architectural part in residential, industrial and commercial projects, where we present in the department plans and designs compatible with the client's requirements and compatible with the requirements of the municipality and the requirements of the MOODN.
