## Experience

2018 - Present

### Project Manager, Consultant

**Saudi Railways Organization (SAR)** Dammam, Saudi Arabia

Project manager / consultant in the preparation of project study. Achieved a milestone in preparation of preliminary design basis for all projects. Completed and reached target for completing all Request for Bid (RFB) packages. Successfully completed the implementation of construction management of several projects by achieving the required KPI's on schedule and under budget. Successfully completed the Organizational Business Development target, by interviewing and hiring professional engineers and specialist to form the backbone of the inhouse preliminary engineering studies team.

#### Accomplishment:

- Completed the set up of the engineering team in the civil, mechanical, electrical, instrumentation, CCTV, security and contracting management. Enhanced the engineering deliverables in the design stage and constructability of ongoing projects.
- Consistently met my short and long-term targets.
- Proactively participated in meetings and helped create new practices.
- Answered calls, responded to emails, and spoke with clients face-to-face.
- Processed a range of documentation and entered information into data base.

Apr 2015 - Sep 2018

### Project Manager

**Fluor Arabia Limited (FAL)** Al Khobar, Saudi Arabia

Project manager and team leader in the design and construction phase in the SADAR project team. Resolved and achieved target on the construction of the chemical laboratory center. Helped the client in resolving design review issues on the site and met the target completion schedule by reducing the design changes and reduce the cost of all negotiated change orders. Procured all outstanding materials on the site and reduced the schedule delivery of critical items.

### **Accomplishment:**

- Accelerated the delivery of outstanding materials, Completed the lab project on schedule and underbudget.
- Effectively communicated the scope, schedules, and budgets with both customers and contractors on a verity of projects.
- Consulted with customers on deadlines and service level agreements.
- Developed strategy and architecture for client in alignment with business plans.

2012 - Jul 2014

### **Project Manager**

**Saudi Aramco, Direct Hire** Multiple Locations within Saudi Arabia

Project manager / Supervisor in the upstream pipeline projects. Supervised the the completion of all water and oil wells from the detail design to the construction and commissioning of all wells in the Northern Area including Shaybah upstream projects. Achieved the highest number of wells completion in the department. Enhanced the the speed of the contractual award of all assigned projects by mentoring of young Saudi Engineers and expats. Developed a reconciliation process of all costs associated with construction contractors, which eliminated the cost overrun on all well projects.

### **Accomplishment:**

- Implementation of online MCC completion on SAP system, which reduces the cycle of approval.
- Completed all outstanding incomplete oil wells in Qatif area
- Completed the installation of new offices in the Northern Area.
- Negotiated and approved several contracts, which reduced the cost and improved schedule delivery of all assigned projects.
- Worked in changing management legacy systems and with transition teams to implement new training processes.
- Managed delivery of end-to-end projects.
- Successfully identified clients 'needs in order to make recommendations on the most effective forms of construction methods based on each project's individual budget.

2009 - 2012

### **Sr. Project Engineer**

**Saudi Aramco, Direct Hire** Northern Area Maintain Potential Projects, Qatief Area

Sr. Project Engineer in the Oil & Gas maintain potential projects, Northern Area Unit. Completed the missing roles by enhancing the development of the existing team and hiring additional professional key staff to support the completion of outstanding well projects. Supported the material procurement specialist by accelerating the delivery of all outstanding materials and achieved the KPI of the all well completion. Provided an excellent communication across the department to expedite the award and completion of all type of contracts. Negotiated all change orders with contractors and reduced the cost by eliminating all fat in the contractor proposals. Communicated with all clients and technical team across the company to accelerate and deliver critical projects on budget and targeted schedule completion. Communicated and approved all the HSE requirements to all staff and contractors and met all safety requirements within the unit.

### **Accomplishment:**

- Monitored progress and managed problems or setbacks when necessary.
- Ensured that projects were completed on schedule and within the project's budget.
- Confirmed compliance with OSHA safety standards. Completed a two-year construction project with no lost-time injuries.
- Coordinated workers and suppliers to ensure efficiency and reduce company costs.

2007 - Sep 2009

### **Lead Project Engineer, Cross Country Pipeline Projects**

**Saudi Aramco, Direct hire** Multiple Locations within Saudi Arabia

Lead Project Engineer in the KAUST project. Supervised the construction activities of the housing and hotel projects in Thwal area. Provided technical support and guidance in the construction phase, which yielded to acceleration in the completion of the hotel project. Provided QA/QC on all materials provided by the contractor, which eliminated rework and improved schedule completion of the project. Reviewed and negotiated several change orders with contractors, which resulted in lower cost for the company. Provided on site consultation on the safety requirements prior to start of work, which resulted in lower incidents and injuries.

**Accomplishment:**

- Completed the housing project in KUAUST
- Completed the Hotel project in the university compound
- Completed BI-3155, propane gas pipeline from RTR to Juaymah gas plant
- Completed AY-1 pipeline project (1000 km) from Abqaiq to Yanbu
- Completed the upgrade of all pump stations from 1 to 7
- Completed the Ethan gas pipeline from Juaymah gas plant to Royal commission
- Completed the sweet gas pipeline (BI0024) to the gas plant

Dec 2005 - Jun 2007

### Project Engineer, Maintain Potential Projects

**Saudi Aramco, Direct Hire** Multiple Locations within Saudi Arabia

Project Engineer in the upstream projects, pipeline projects department. worked on the oil and water wells projects. Supervised the engineering and construction work. Helped the design contractors in the development of standards drawings for the wellhead piping, instrumentation, civil and electrical work. The implementation of standard drawings accelerated the completion of the design work. Implemented standard construction contract, and achieved lump sum wells in one contract, which resulted in more effective and reliable construction method and on time completion. Provided standardization of all materials required for the well head, which resulted in the reduction of the scheduled completion of the fabrication process.

**Accomplishment:**

- Completed the design and construction for the rehabilitation of existing pipeline from Abqaiq to Qatif bulk plant, BI-3095
- Completed all oil & water well in Hardh area, that are required to commission Haradh GOSP-2
- Completed all the assigned wells in Abqaiq, Southern area
- Completed all assigned projects in the southern area design and construction in the maintain potential projects
- Consistently met the short and long-term targets
- Handled customer complaints with empathy and compromise

1998 - Dec 2004

### Project Engineer, Abqaiq Plants Projects

**Saudi Aramco, Direct Hire** Abqaiq, Saudi Arabia

Project engineer in Abqaiq Plants Projects. Worked in the design and construction of the installation of four (4) electrical and one turbine compressors. Close coordination with the client is necessary on this project to decide on the location of the new compressors. It was decided to construct the new equipment's next to the existing running units to reduce the down time. Achieved the completion of all compressors with minimum shutdown time. These units provided instruments and utilities air for the plant. Provided vendor assistance in the pre-commissioning / commissioning, which resulted in less down time for these vital units.

**Accomplishment:**

- Supervised and delegated tasks to a team of [12] people.
- Completed the commissioning and hand-over of compressors to client.
- Liaised with all stakeholders including contractors and sub-contractors, clients, and the local authorities.
- Obtained construction permits and completed construction safety assessment

- Always stayed within budget and advised the project manager to optimize costs (12% decrease) within the first two projects.

Jan 1990 - Dec 1997

## Project Engineer, Southern Area Design Services unit

**Saudi Aramco, Direct Hire** Abqaiq, Saudi Arabia

Project Engineer in the Southern Area design services unit. Inhouse design of small projects to support the client in the southern area operation. Completed all projects assigned in the mechanical, civil, instrumentation and electrical work. Inhouse stress analyses, scope of work, materials take off and CAD/hand drafted design drawings. Assisted the company in the reduction of cost and schedule. Provided consultation and construability reviews on all projects, resulted in cost savings and minimized schedule impact to the client.

### Accomplishment:

- Created performance requirements and quality standards for new engineering projects.
- Participated in departmental meetings and made detailed presentations whenever necessary.
- Adhered to company SOC regarding the use of PPC and other safety guidelines to ensure maximum quality and safety at the workstation.
- Applied specialized tools such as AutoCad and solidworks to develop concepts of fixtures and jigs.

## Education

Aug 1985 - Jan 1990

### Mechanical Engineering Science / Thermal Option

**University of Southwestern Louisiana** Lafayette, LA. USA

Mechanical Engineering Science Degree, Thermal Option.

## Languages

**English**  
Advanced

**Arabic**  
Native

## Skills

Project Management	Business Development	Risk Management	Project Controls
Contract Management	Microsoft office and Microsoft Excel	HSE Management	HR Management
SAP Management	QA/QC Procedures		

## Achievements

- Reduced the cost of the installation of a new metering skid in the gas plant by selecting an existing and have done a refurbishment work on it. This resulted in a cost saving of \$ 200,000.
- Eliminated the need for shutdown in RT Refinery, by doing Hot Tapping of existing piping, which resulted in cost saving of more than \$ 300,000.

## Certifications & Courses

Completed the Project Management Professional Certification (PMP). This included the pre-course for this certification.
