Personal Details:

Date of Birth : 07/03/1993

Status : Male/Single

Nationality : INDIAN

Current City : Abu Dhabi

Passport Details:

Passport No : P8844309

Passport Exp. : 27/04/2027

Languages Known:

English
Hindi
Malayalam

Hobbies:

Drawing

CURRICULAM VITAE

CARRIER OBJECTIVE

Intend to build a career in Oil and Gas field with leading corporate of hi-tech environment with committed and dedicated people who help me to explore myself fully and realize my potential.

PROFESSIONAL EXPERIENCE (4 Years)

Company Name : PARASCADD PVT. LTD.

Location : Mumbai (Base) , Abu Dhabi

Designation : Piping Engineer

Date : 15th Dec 2016 to Present.

PROJECTS SUMMARY

- PETROFAC INTERNATIONAL LLC - 2019 July To Present- JI-2042 Majnoon
- PETROFAC INTERNATIONAL LLC - 2018 June To 2019 July-JI-2033 Salalah
- TAMIMI INDUSTRIAL SERVICES (KSA)- 2018 March To 2018 June
- MISI SETIA OIL & GAS -2017 Aug To 2018 March
- VATANA PHAISAL ENGINEERING CO LTD (Thailand) -2017 June to 2017 August
- RENAISSANCE HEAVY INDUSTRIES (Russia) -2016 Dec To 2017 Jun-Zabsip2,Tobolsk.

GENERAL RESPONSIBILITIES

- All the detailed activities related with generation of Pipe fabrication and Erection drawing and creating reports by using ISOMEK and AUTOSPOOL.
- Management of fabrication and erection activities by SPOOLMAN and ERMAN.
- Inventory management and material control by STOREMAN and MATCONTRK.
- Effective communication with the clients.
- Data Handling and preparation.

EDUCATIONAL QUALIFICATION

SI NO.	Qualification	Board / University/ Institution	Year of Passing	% of Mark / CGPA
1	PGDC IN PIPING DESIGN ENGINEERING & CONSTRUCTION	Asian Academy of Professional Training, Pune	2016	-
2	B TECH IN MECHANICAL ENGINEERING	Mahatma Gandhi University, Kerala	2016	7.82 (CGPA)
3	DIPLOMA IN MECHANICAL ENGINEERING	Department Of Technical Education	2013	9.11 (CGPA)
4	PRE DEGREE (COMPUTER SCIENCE)	BOARD OF HIGHER SECONDARY EXAMINATION	2010	76%
5	SSLC	GOVERNMENT OF KERALA	2008	96%

TECHNICAL PACKAGES

- AUTOSPOOL - Automatic piping and spooling
- SPOOLMAN - Piping spool, material and construction management
- ISOMECH - Automatic Piping Isometric Drawing
- MATCONTRK - Material control & tracking from Engineering to Procurement
- STOREMAN - Material control & tracking from Engineering to Procurement
- ICGP - Item Part Number creation
- ERMAN - Piping spool, material and construction management
- PDMS - Plant Design Management System
- AUTO CADD (MECHANICAL)- computer-aided design and drafting software
- PTC CREO -Creo Elements/Direct Modeling
- Introductory knowledge of CAESER II

HANDS ON PROJECT EXPERIENCE DETAILS

Company : Petrofac International LLC.

Project : JI-2042 Majnoon, Iraq & JI-2033 Salalah LPG , Oman

Position : Project Engineer

Period : 2018 June To Present

Responsibilities:

- Management of Spooling, Fabrication & Erection activities for Piping scope with EPCROMAN application.
- Coordinate with engineering and Process with the client on detail engineering requirements for the spooling procedure.
- Coordinate with planning of the piping scope from starting and completion for each phase of construction & fabrication on priority basis in various sub-contractors.
- Effective Look Ahead & Matching front analysis report presentation for project planning material tracking, work front, material allocation and tracking using by management software.
- Issuance of Job card to Subcontractors as a work front release for completely possible spools & also Material Handling, Recording, tracking for shipping status, material bifurcation, Sub contractor store handling including final Material Reconciliation, NDT spool clearance, Paint system management & dispatch planning.
- Ensuring the norms of Quality and HSE in Fit-up, Welding and offering it NDT testing in Fabrication Shop.
- Coordination with Spooling team, Shop team, Site team, HO project team & multiple Subcontractor to monitor project progress & weekly report basis.
- Preparations of Purchase Request, Purchase order, Daily material record, OSRD Report and inspection Reports in STOREMAN with MTC certificates by using MATCONTRK software & also material shortage action proposition for Air freight.

- Supervise directly the sub-contractor day to day scope of works engaged in the piping works to ensure that quality output is completed on schedule and to the acceptable standard and required specifications.
- Report day to day construction activities to construction manager, continuously monitor the contractor manpower, material and equipment's resources mobilization or shortages & report to construction manager.
- Monitoring, Tracking and Approval of field & Shop Modifications of joints w.r.t. the cost analysis.
- Calculation of Spool Fab shop billing & preparation of dispatch plan from Abu Dhabi & Sharjah to Iraq.
- Dispatched spool tracking by barcode & RFID in erection site.
- Record verifying for the final test pack clearance & Punch point creation with Mechanical clearance, Reinstatement for the final erection of piping scope.

Company : Tamimi ,KSA & MISI SETIA, Malaysia.

Position : Piping Engineer ,

Period : 2017 August To 2018 June

Responsibilities:

- Effective Site Support for proper management and control of Piping activities by EPCROMAN software.
- Coordinate with engineering and with the client on detail engineering requirements.

Company : Vatana Phaisal Engineering & Construction , Thailand.

Position : Piping Engineer

Period : 2017 June To 2017 August

Responsibilities:

- Effective Training & Implementation of EPCROMAN software in VPE.

Company : RENAISSANCE HEAVY INDUSTRIES (Russia)

Position : Piping Engineer

Period : 2016 Dec To 2017 June

Responsibilities:

- Working as Spooling Engineer, performing spooling activity to ease the fabrication and the erection work.
- Coordinate with engineering and with the client on detail engineering requirements.
- Generating Piping Fabrication and Erection Isometrics and related Reports based on Fabrication / Erection site Requirements, Best Practices of International Fabrication, Client Requirement Standards.
- Generation of Spool Drawing and Erection drawing with all construction measurement data like Inch Dia, Surface area, Inch Meter etc.
- Joint Numbering, Field joint identification including the incorporation of revision.

- Efficiently do Revision management and must retain spool number, weld number, and draw with respect to the previous master revision
- Coordinate with client and incorporate shop/field changes to the existing drawings.
- Generating, Controlling and Tracking of MTO such as Spool wise MTO, Erection MTO, Support MTO
- Generating reports which are being used for Test Pack preparation.
- Supporting the Site Engineer with proper guidance and providing essential data.
- Also Recording and updating of fabrication and site progress such as welding, NDT, painting, etc.
- Proper Tracking and Controlling of all Fabrication/Erection Site activity through Epcroman Software.

INTERNSHIP & INDUSTRIAL VISIT

- 15 days industrial training at KERALA SOLVENT EXTRACTION (KSE), IRINJALAKUDA.
- 10 days Industrial training at ITL MAHINDRA, KANNUR.
- Industrial visit at HAL, BANGALORE.

ACADEMIC PROJECT DETAILS

- Research on MPA TIG (Metallic Powder Activated TIG) Welding.

ACHIEVEMENTS

- Won prize in BEST MACHINIST competition during college Technical fest.
- Certificate issued by Vertical eye for the successful completion of the Training Workshop "EMPOWER" on power communication.

DECLARATION

I hereby declare that the information given above is true to the best of my knowledge and belief.
