📍 7381 Ishbelia Al Khobar, Eastern Province, 31952

EDUCATION

APPLIED SCIENCE UNIVERSITY
GPA: 3.3

Bachelor of Science (B.S.) Computer Science

Relevant Coursework
- Data Mining Principles and Techniques
- Object-Oriented Programming I and II
- Web-based Software Development I and II
- C# based Graduation Project/Thesis
- Software Engineering I and II

Extracurricular Activities
- Bahrain Collegiate Programming Contest
- British Council Special Research Competition
- ASU IEEE Council
- AuCoda Au Elite Program

ADDITIONAL SKILLS

Fluent in English and Arabic

Great leadership skills

Fast learner and high paced worker

Highly skilled at executing queries for accurate results and analyzing the resulting data

Well skilled in organizing and coordinating a cross functional team

Open and honest communicator

EXPERIENCE

SOFTWARE DEVELOPER AND PROJECT MANAGER
Raqtan, Al Khobar, Eastern Province / Mar 2021 - Aug 2021
- Analyzed and manipulated data to display information in an easily understandable manner
- Direct software programming and development of documentation.
- Store, retrieve, and manipulate data for analysis of system capabilities and requirements.
- Develop or direct software system testing or validation procedures.
- Supervise and assign work to programmers, designers, technologists, technicians, or other engineering or scientific personnel.
- Groomed by management to handle teams and set development processes for a smooth workflow.
- Assign duties, responsibilities, and spans of authority to project personnel.
- Direct or coordinate activities of project personnel.
- Establish and execute a project communication plan.
- Initiate, review, or approve modifications to project plans.
- Monitor or track project milestones and deliverables.
- Confer with project personnel to identify and resolve problems.

SOFTWARE DEVELOPER
AuCoda | Dhu3, Manama Aug 2020 - Jun 2021
- Modify existing software to correct errors, allow it to adapt to new hardware, or to improve its performance.
- Analyze user needs and software requirements to determine feasibility of design within time and cost constraints.
- Consult with customers about software system design and maintenance.
- Obtain and evaluate information on factors such as reporting formats required, costs, and security needs to determine hardware configuration.
- Recommend purchase of equipment to control dust, temperature, and humidity in area of system installation.
- Analyze information to determine, recommend, and plan computer specifications and layouts, and peripheral equipment modifications.
