**Responsibilities:**

- Initiate Safety Committee meeting and provide updates on current safety issues, including good OH&S practices, and mitigating measures to identify area of improvements.
- Coaching, mentoring and implementation of the OH&S programs.
- Regularly review and familiar with all applicable legislation and applicable standards, to ensure compliance Company, client and local legislative standards..
- Inform project management team and supervision of any new or conflictive legislative matters that could impact the project.
- Improve and update Site Safety Management Plan (SMP) for the project to ensure appropriate safe work environment for all company employees, contractors, visitors.
- Initiate toolbox talks/pre task safety meetings highlighting relevant hazards in the workplace and instigating conformance to work methods or safe systems of work to control, or if practicable, eliminate exposure of personnel including materials and equipment to workplace hazards. Provide direction, support and resource to all site managers, supervisors, foremen and safety advisors.
- Ensure that all incidents are reported immediately.
- Participate and assist the supervisors, foreman and safety advisors in the investigation of incidents to determine root cause, and corrective actions where necessary.
- Ensure incident corrective actions are followed up on and closed.
- Ensure injured workers are offered modified duties and documentation has been completed. Monitor and follow up on modified workers in the field.
- Ensure Safety Representatives are verifying field staff training and competencies; consult the project management team and Safety Manager for compliance and action plan.
- Review safety requirements of the client and ensure they are carried out as per the terms of the agreement, and communicated to the Project Manager, Supervisors, Foreman and Safety Advisors.
- Ensure new hires are inducted, and all required documentation is completed accurately.
- Ensure safety boards with postings including but not limited to: Health and safety policy, inspection and audit results, project hazard assessment, location of first aid, emergency assembly point, etc. are maintained and current.
- Ensure document availability in the project such as Project HS&E Manual, the applicable government legislation and regulations, site safety inspection forms, observation forms, tailboards and log books, fall protection plans etc.
- Prepare for, and participate in audits such as OHSAS 18001/ISO 45001, ISO 9001, ISO14001 and/or Owner IMS and other Technical Audits e.g. HVAC, Electrical, FDAS etc.
- Communicate, coach and assist the field staff to ensure that all safety expectations are understood and met.
- Coordinate a regular meeting with project safety team to review issues, trends and upcoming conditions or events.
- Other duties as required.
