- 10-06-2020 To Until Date

- **Company** : **Allied Rental Modaraba**
- **Project** : PTC KPK Peshawar
- **Position** : Technician
- **Period** : 01-06-2011 to 29-12-2011
-

- **Company** : **Allied Rental Modaraba**
- **Project** : Zong & Mobilink Head Office
- **Position** : Technician
- **Period** : 29-12-2011 to 09-11-2013

Technical Skills:

- Effective utilization of manpower & raw material.
- Monitoring & implementing work schedule as per the level plan step by step.
- Application of inventive skills and awareness regarding standers and procedure's to follow up with quality and quantity work progress.
- Check for any damage or discrepancies and report through an Over, short and Damage Report.
- Tracking and recording RFI and work progress on site.
- Inspection of electrical materials and equipment prior to any installation.
- Conducting Megger test for high and low power cables.
- Supervision of the actual installation of technical team such as cable tray installation, grounding, cabling, electrical equipment installation, termination and splicing of HV , LV cables and junction box.
 - Issues with proper coordination in order to move the job smoothly without any delay
 - Addressing subcontractors issues and make sure they are well equipped with required documents and materials related to construction activities and make sure to get optimum output to finish job work on time
 - Good knowledge in SABIC & SAUDI ARAMCO SHEMS and permit preparation as receiver
 - And executing job work safely as per safety standers
- Cable Tray / Conduit Installation
- Cable laying, Cable Mongering, Termination
- H.V and L.V Switch gear, Transformer, LV & HV Motors
- Insulation Resistance Test (Megger up to 5000 Volts)
- Hi-pot test (AC-DC) of cable- breakers – bus bars
- Loop testing and simulation check
- Earth / grounding test

- Installation of cable trays and plc panel installation
- Installation of different type conduit (emt uit (emt
- Replace pneumatic transmitter to electronic transmitters.
- Termination different type pneumatic / electro pneumatic smart positioners.
- Installation and termination fire alarm system
- Installation and termination of smoke detector & heat detectors,
- Troubleshoot different type of switches, installation & termination,
- Installation of supports for cable trays,
- Installation & termination CCTV cameras,
- Installation & termination of microwaves transmitters & receivers,
- Installation of capillary type transmitters,
- Installation phenolic tags hanging tags & sunshades,
- Termination of MOV & LCP,
- Installation and termination all type of transformer
- Cable pulling for ATS panels and gland termination.
- Capable of conducting, continuity and merger test.
- Loop test and commissioning of all data cables
- All cable layout from field to marshalling.
- Function checked and pre-loop checked.
- Function checked and loop checked of all LCP PP LP Panels
- All control values field calibration and function checked of motor operation value.
- Can read instrumentation location diagram.
- Marshalling cabinet termination
- Can conduct mega earth for grounding.
- Cable continuity test for instrument and electrical cable.
- Junction box installation and termination.
- Basic operation knowledge and well aware with rule regulation and safety procedure about job.
