PERSONAL SUMMARY

مطور تطبيقات ويب وأجهزة جوال محترف يستخدم أحدث التقنيات الهجينة لأداء أفضل وريح أكثر. يمكن شرح خبرتي الممتدة التي تبلغ 10 سنوات بشكل أفضل من خلال عرض تقديمي لأنظمة سابقة قمت بإنشائها والتي يمكن أن تكون أيضاً دليلاً على أنه يمكنكم تحقيق تقريباً أي شيء قد تطلبونه من عالم التكنولوجيا، من أفكار وأنظمة وحلول رقمية تشمل أيضاً التحول الرقمي

A professional Web And mobile developer using latest technologies of ASP.NET/Hybrid for better performance and more profit. My almost 10 years of extensible experience can be better explained with a Previous systems built presentation which can also be a proof that you can achieve with me almost anything that you can imagine from the tech world.

PERSONAL INFORMATION

Birth date: 27 September 1990

Nationality: Lebanon

Residence Country: Saudi Arabia – Medina

PREFERRED JOB

Preferred Job: Asp.net Web And mobile Developer للموبايل والنت ومبرمج التقنيات الهجينة للموبايل والنت , مهندس برمجيات , مهندس برمجيات Web/mobile Developer, asp.net , head of web developers, asp.net web developer مطور

Field: Information Technology

WORK EXPERIENCE

Total Years of Experience: 10 years, 11 months

Points at Skills

May 2021 – Present

Saudi Arabia – Medina

Introduction:

As a full stack developer I Offer the following:

- Databases of SQL From All Sorts Of Managements Related To IT. Database development, reporting development and data migrations
- Perform database design by analysing business requirements
- Develop complex SQL queries, stored procedures, and SSIS package
- Define and develop a data migration strategy between different products and platforms
- Optimization and tuning of SQL – Design, develop and migrate SSRS reports
- Meet with business experts to analyse and document requirements from a database perspective
- Assist database administrators (DBA) in defining architectural standards for database applications
- Review applications and database design for compliance
- Assist in troubleshooting and resolution of database issues
- Assist in the application development, debugging, configuration and optimization
- As a DevOps' Engineer will offer System Analyzation with following Key skills: ● Strong analytical skills
- Attention to detail
- Teamwork skills

- Written and verbal communication skills
- Interpersonal skills
- Flexibility
- Adaptability
- Initiative
- Proficient In Multiple Technologies
- Radically Distinctive Code.
- Complete web and hybrid development process
- Practical implementation of concepts
- Front–end programming
- Back–end programming
- Databases
- Testing
- Debugging
- Familiar with the latest web development technologies
- Technical Business Marketing.

Contributions by : Contributed in building educational systems using CMS, MOOC, LCMS, Totara and any other system for education management on both managerial as well as technical procedures, Technical Languages C#, JAVA, C, SQL, MS office, IOS applications, ASP.NET Webforms, ASP.NET core, Odoo, Python, Android, Html5, Nodejs, cordova, applications, xamarin, phonegap, web server configuration, bootstrap, CSS, HTML5, CSS3, Jquery, Javascript, Angular js, XML, W3, W3 layout, Web API TINCAN, XAPI, XAML, Application Development, Prolog, PHP, Front End Development, Web platforms, moodle, Cross–browser compatibility, Photoshop, Flash, React, Illustrator, AutoCAD, Design, Web Design, Artificial Intelligence, Web Programming, Mobile Applications, Cyber Security. Several CMS Like: Wordpress, Joomla, Kentico, Drupal, Magento and Prestashop. Several projects to be mentioned like:

I) Odoo ERP System: Installation and Professional Training in this category is Complete and biased towards professional outcome. odoo.com

II) A site built for the Islamic university in Madinah and it demonstrates my abilities in building complete trusted systems.

III) A Complete general system for managing startups: Built a general system for managing projects both product and financial wise. Called, PMS which stands for project management system. Project Management Electronic System (PMES)

IV) A Complete general system for managing commercial projects: Built a system for managing Hotels and operating them both Booking and financial wise. Called, HMES which stands for Hotel Management Electronic System.

V) Built A Complete general system for managing strategical and operational goals: Built a system for managing strategical, operational, main and branched goals of a company or an institution. The system was built with 4.5 ASP.NET, C#, WebServices, Extreme programming , AJAX , MVC, IIS, MS SQL., ADO.NET, AJAX, J–Query, Javascript .JSON The system was built in an independent nodes procedures to ensure that the system wont block if a tool broke down. Amcharts, chartjs for graphs. HTML 5, TFS, API, web services, Bootstrap, CSS3, Font–Awesome, CDN. Other techniques have also been used and a great variety of external programming techniques.

VI) A new Sorting Algorithm : In the world there are 6 sorting algorithms in progress as mentioned by the academic world, SUCCESSFULLY built a 7th one and was working well with efficiency 5th–6th in speed.

Madinah Award for Excellence

Saudi Arabia – Medina

<https://madinahaward.org.sa/>

<https://roaait.com>

<https://mazaya.monshaat.gov.sa/ar/mazaya/233#dev-card-rules>

Built many systems for private and public sectors, the Madinah National Award for Excellence in Public Sectors was one of them. It was composed of marketing website along side a whole complete system for managing the Evaluation Techniques followed by their Evaluation mentors including office operations (a-z ops). It was a complete system.

Also made a system for the public electricity company which allows them to follow their projects in their own ways mimicking their professional environment .

Built a system for a public sector which was the center for curing autism. it was a complete CRM that was built specially for them.

Also many more projects are currently active.

As a full stack developer I Offered the following:

- Databases of SQL From All Sorts Of Managements Related To IT:
- Database development, reporting development and data migrations
- Perform database design by analysing business requirements
- Develop complex SQL queries, stored procedures, and SSIS package
- Define and develop a data migration strategy between different products and platforms
- Optimization and tuning of SQL – Design, develop and migrate SSRS reports
- Meet with business experts to analyse and document requirements from a database perspective
- Assist database administrators (DBA) in defining architectural standards for database applications
- Review applications and database design for compliance
- Assist in troubleshooting and resolution of database issues
- Assist in the application development, debugging, configuration and optimization
- As a DevOps' Engineer will offer System Analyzation with following Key skills:
- Strong analytical skills
- Attention to detail
- Teamwork skills
- Written and verbal communication skills
- Interpersonal skills
- Flexibility
- Adaptability
- Initiative
- Proficient In Multiple Technologies
- Radically Distinctive Code.
- Complete web and hybrid development process
- Practical implementation of concepts
- Front-end programming
- Back-end programming
- Databases
- Testing
- Debugging

- latest web development technologies
- Technical Business Marketing.
- And More..... Will Be clarified if given the chance to meet you.

software director/developer at Nama el tamayoz

February 2019 – Present

Saudi Arabia – Medina

The job was to make a system that the market doesn't has something similar to it. The idea of the system is to manage all the strategical main and sub goals. also operational goals and the plan of the institution at every side of it. Plan Institution wide and follow up with every KPI you might need, it was remarkable in terms of a product and it was unique. Also another product was made which serves electrical engineers in the fields of water desalination.

كانت المهمة هي إنشاء نظام لا يحتوي سوق العمل على شيء مشابه له. فكرة النظام هي إدارة جميع الأهداف الاستراتيجية الرئيسية والفرعية. أيضاً الأهداف التنفيذية وخطة المؤسسة في كل جانب من جوانبها. كانت رائعة من حيث المنتج ولا شيء مماثل لها. كما تم عمل منتج آخر يخدم المهندسين الكهربائيين في مجالات تحلية المياه.

A software developer for many other institutions at IT

February 2018 – Present

Saudi Arabia – Medina

إنشاء أنظمة لعدة مؤسسات وشركات خاصة

Full Stack Web/Mobile Developer مطور كامل للبرمجيات at Freelancing

April 2018 – February 2019

Saudi Arabia – Medina

Full Stack Developer, For various Commercial institutions as a freelancer. Made several systems, like a legit booking system based in the local Saudi hotel needs, it allows you to book a ticket for anywhere hotel in Saudi Arabia. Also another system was made for managing medium size projects and it allows complete follow up of products and financial issues of each and every project submitted into the system.

also another system was made for dentists which allows them to follow all their patients, financially with special tweaks which opens path for commercial roots as it allowed the user to have a commercial website with CMS.

As for Digital Marketing made a CMS that can Double effect of Social networks with programmatic algorithms. And many more successful systems were built.

مطور كامل للبرمجيات ، تم عمل عدة أنظمة لمؤسسات تجارية مختلفة ومستقلة. مثل نظام حجز شرعي قائم على احتياجات الفنادق السعودية المحلية ، تتيح حجز تذكرة لأي فندق في المملكة العربية السعودية. كما تم عمل نظام آخر لإدارة المشاريع المتوسطة الحجم ويسمح بالمتابعة الكاملة للمنتجات والمسائل المالية لكل مشروع مسجل في النظام. كما تم عمل نظام آخر لأطباء الأسنان يسمح لهم بمتابعة جميع مرضاهم مالياً وأيضاً بتعديلات خاصة تفتح الطريق للمتابعة العادية التجارية لأنها سمحت للمستخدم أن يكون لديه موقع تجاري دعائي مع نظام إدارة محتوى.

Software Developer مطور برمجيات at Islamic University in Madinah

November 2017 – March 2018

Saudi Arabia – Medina

Software developer referenced by the ministry of education to make a system for following all projects of the Islamic University.

مشار كمطور البرامج من قبل وزارة التربية والتعليم لعمل نظام لمتابعة جميع مشاريع الجامعة الإسلامية.

Administrator at Nuzum

Saudi Arabia – Medina

CEO Assistant and Mobile\Web developer\Dev Ops Eng.

o Through this Mindful Company of its employees I had the ability to develop mobile/web applications using Phonegap, XAPI, Tincan and almost every aspect of programming from a managerial position along with business related issues. I also had to prepare documents, memorandums, meetings, reports, investigations, researches, collaborations, Artefacts, Content, Digital Content, Shows, Profiles, presentations, warnings, professional service agreements, job descriptions, legal documents/treaties, follow employees and customers as well, following would also include outdoor tasks such as going to the ministries/ chamber of commerce/ legal offices/ financier offices, be a representative/presentative, prepare businesses plans/business plans of other companies and coordinate them with ours, coordinate remotely with the other branches of Nuzum because Nuzum had 8 branches around the world. So i used to develop and share info along developers from London, India and Sudan along with me. A side with the expectations of a successful business man.

مساعد الرئيس التنفيذي والمحمول \ مطور الويب \ مهندس عمليات التطوير

من خلال شركة تعتنني بموظفيها ، كان لدي القدرة على تطوير تطبيقات الهاتف المحمول / الويب باستخدام وكل جوانب البرمجة من منصب إداري إلى جانب القضايا المتعلقة بالأعمال. Phonegap و XAPI و Tincan. قمت أيضا بإعداد المستندات والمذكرات والاجتماعات والتقارير والتحقيقات والأبحاث ومذكرات التعاون والمحتوى الرقمي والعروض والملفات الشخصية والعروض التقديمية والتحذيرات واتفاقيات الخدمة المهنية ووصف الوظائف والمستندات / المعاهدات القانونية ومتابعة الموظفين والعملاء بالإضافة إلى ذلك ، شملت المهام الخارجية مثل الذهاب إلى الوزارات / غرفة التجارة / المكاتب القانونية / المكاتب المالية ، ممثلاً ، إعداد خطط الأعمال / خطط الأعمال للشركات الأخرى وتنسيقها مع شركائنا ، والتنسيق عن بُعد مع الفروع الأخرى لها 8 فروع حول العالم. لذا اعتدت على تطوير المعلومات ومشاركتها مع مطوري Nuzum لأن Nuzum لـ لندن والهند والسودان.

Philanthropic Teaching of Programming

June 2009 – June 2015

Courses at Charity

Lebanon – Beirut

Taught many levels of students. Specially those majoring Engineering and Computer Science. Pioneered in this field till it flourished with me for many personal benefits. Teaching is in my blood, It allowed me to dig deep in subjects and understanding, taught mathematics, physics, chemistry, programming, Arabic, English, Artificial Intelligence and many more. Did all this while studying human behavior and mentality (from so many trusted sources).

Due to this and more, invented a new sorting algorithm in programming using Java and it was spectacular. The only reason it didn't get famous was due to its speed. There are mainly 6 famous solved sorting algorithms in the world, and making a new one that is totally different than the others was a Well Done Job.

So I still keep it till now and use it as a monument for others to know that I started Big in programming. Inventing new things in the field of programming is easy for me. I made a 7th sorting algorithm, its speed was between the fourth and the fifth, this is why it didn't get famous. But its a proof of my capabilities in exploring, inventing and continuous learning.

Tried inventing new ideas in some other fields of life like physics and mathematics. and it was good to do.

The world of programming that I love. keeps me motivated for every moment I live.

EDUCATION

Bachelor's degree / Computer Science at

Lebanese International University

Lebanon - Beirut

June 2015

Lebanese International University – Beirut – Computer Science– Bachelor Degree

This major allowed me to learn everything needed to become a successful software engineer/programmer.

Invent a new Sorting Algorithm

Compete in the operating system details

Learn every aspect of Cyber security

Immerse in the mobile industry

Invent new algorithms for current systems such as employment

Data structure in every aspect of it

Artificial Intelligence, with its logic and algorithms

Database administration

Networking

Every possible aspect of software engineering

We were taught in the same books that are used at Massachusetts Institute of Technology

Algorithm research

Big Data management

Differential/ Circuit Algorithms /equations/designs

Everything related to the ability to learn new languages

Extreme programming

Communication Skills

Professional Etiquette

الجامعة اللبنانية الدولية - بيروت - علوم حاسب - بكالوريوس
سمح لي هذا التخصص بتعلم كل ما يلزم ليصبح مهندس / مبرمج ناجح.
اخترعت خوارزمية فرز جديدة
تنافس شديد في تفاصيل نظام التشغيل
التعرف على كل جانب من جوانب الأمن السيبراني
الإنغماس في صناعة الهاتف المحمول
ابتكار خوارزميات جديدة للأنظمة الحالية مثل التوظيف
هيكل البيانات في كل جانب منه
الذكاء الاصطناعي بمنطقه وخوارزمياته
إدارة قواعد البيانات
التواصل وأنواعه المهنية
كل جانب ممكن من هندسة البرمجيات
لقد تعلمنا في نفس الكتب المستخدمة في معهد ماساتشوستس للتكنولوجيا
بحث الخوارزمية
إدارة البيانات الضخمة
خوارزميات / معادلات / تصميمات الدوائر التفاضلية
كل ما يتعلق بالقدرة على تعلم لغات جديدة
البرمجة القصوى/العليا
مهارات التواصل
الآداب المهنية
