Summary

Highly dedicated and reliable **Electrical technician** with more than **17 years of** technical and professional career in **Switch gears system**, Power system, Automation Panel, ATS Panel, BMS System, HVAC, Preventive & Corrective maintenance.

Professional Experience

Fire Alarm

One year from June, 2021 to June, 2022 working as a Fire Alarm in Saudi Aramco Dammam – Saudi Arabia.

Fire alarm technicians view electrical layouts contained on the builder's blueprints to determine the appropriate fire alarm system and ensure compliance to electrical and fire codes. They discuss their findings and recommendations with the client and, if the client agrees, install, and test the system to make sure it's properly working. Technicians are also responsible for repairing any problems with the system and replacing defective parts.
